

Quickstart guide to installing Aardvark® v3.4.4 – trial

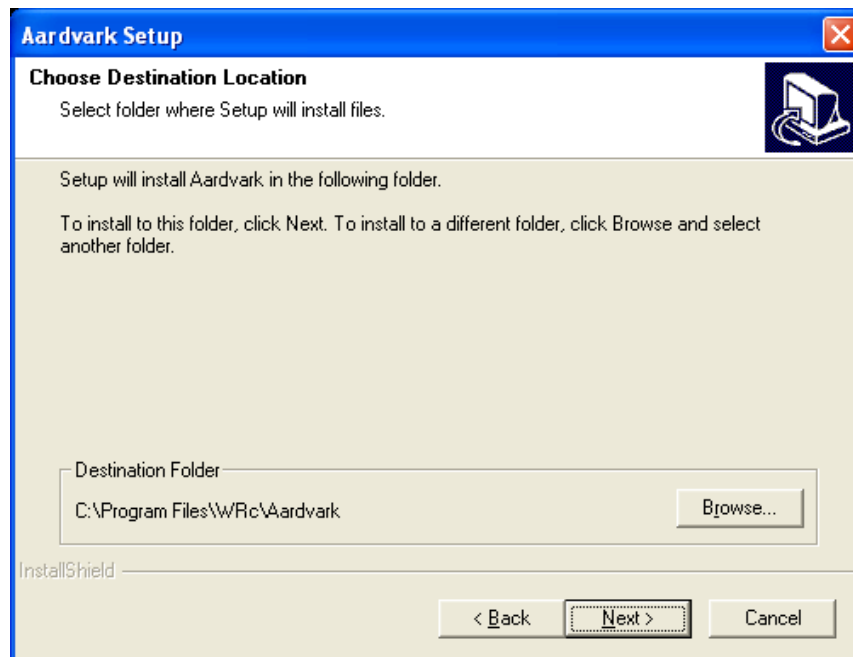

This trial version of Aardvark is protected by CopyMinder® and has been set up to operate for one concurrent user. The trial is a full working version of Aardvark but the number of program executions is limited to 5 in the calendar month starting from the date of installation. So make the most of each session!

1. Ensure that you have Administrator rights to install software on your computer. The setup program checks to see if you have the rights, and will stop if you do not, but if you have elevated rights without administrator rights this may result in the installation failing to detect that you do not have sufficient rights to permit a successful install.
2. Once you have clicked on Run the following welcome screen will appear: Click Next to continue.

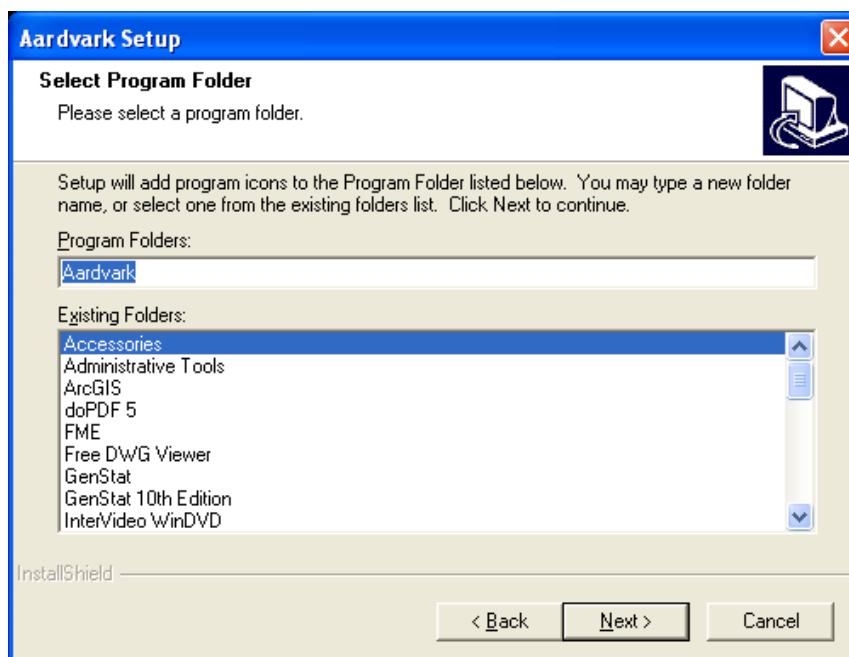

3. The default destination folder (C:\Program Files\WRC\Aardvark) is appropriate if you are running Windows XP (see below).

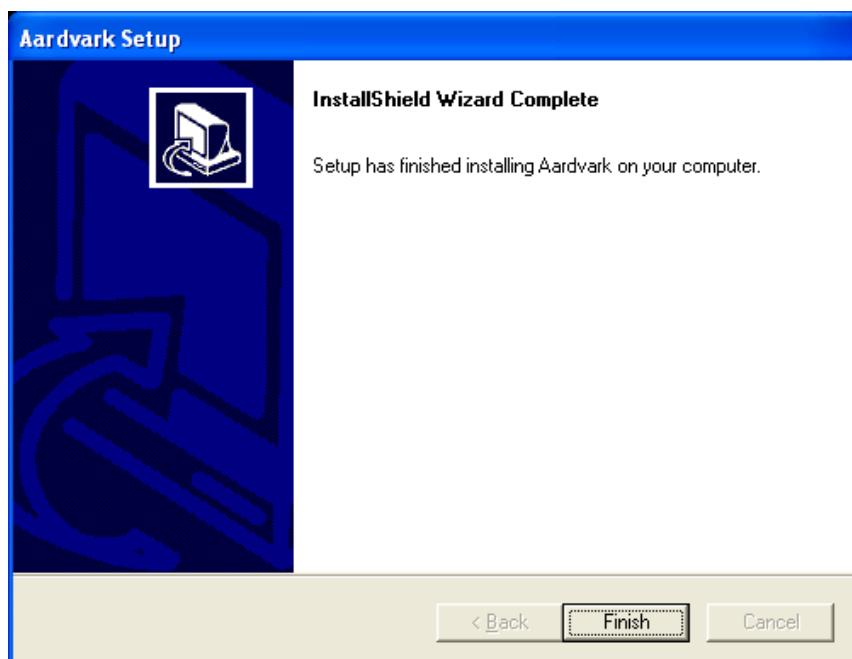

If you use Windows Vista, Windows 7 or Windows 8 then you **must** change the location to C:\Aardvark via the Browse button.

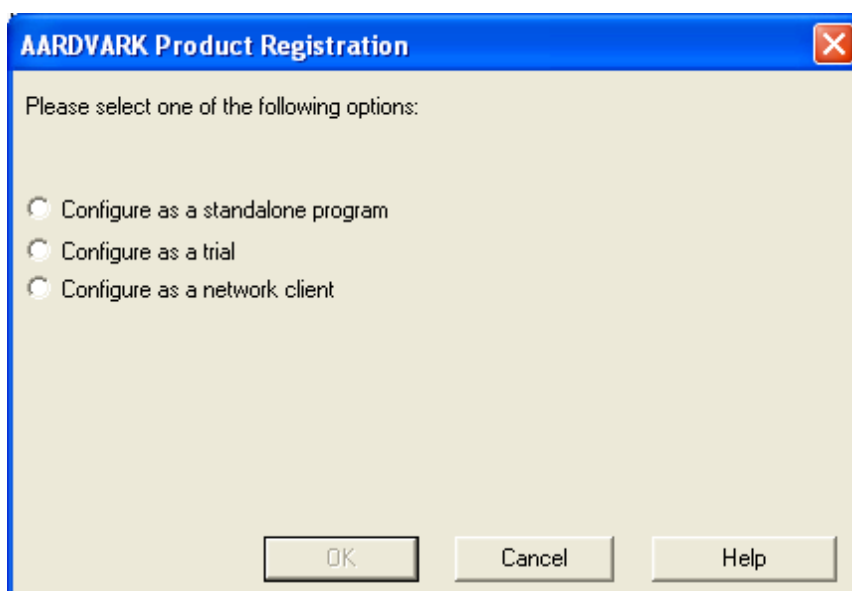

4. Click Next to continue. You will then be offered the choice to select the program icon location for Aardvark. Select your preferred location and click Next to continue.

5. Installation is now complete. Click on Finish

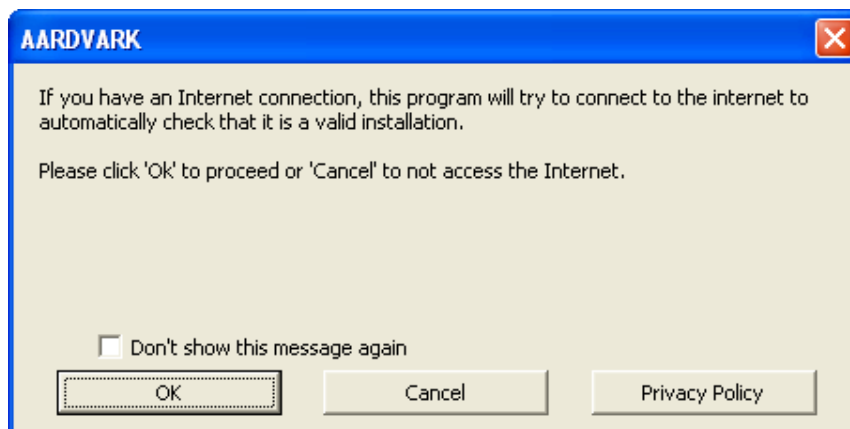

6. The installation will have created a program menu item that can be used to start Aardvark.
7. Once installed, locate the software on the program menu and start up Aardvark. You will be offered three options for Product Registration:

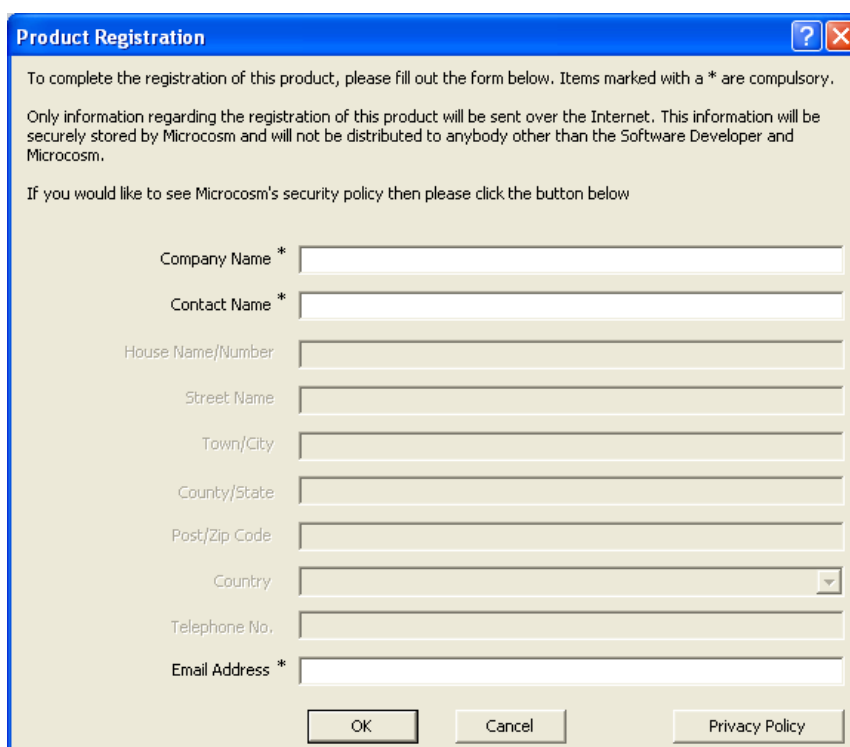

8. Select 'Configure as a trial' by checking the box. You will be alerted that you must have a connection to the Internet to proceed. This version of Aardvark has been configured to run as a trial. Click on 'OK'

- You will be prompted that the Product Registration programme wishes to connect to the Internet to validate the installation. Click on 'OK'. If you click on 'Cancel' the Product Registration process will be terminated and you will need to start the process again by starting up Aardvark.

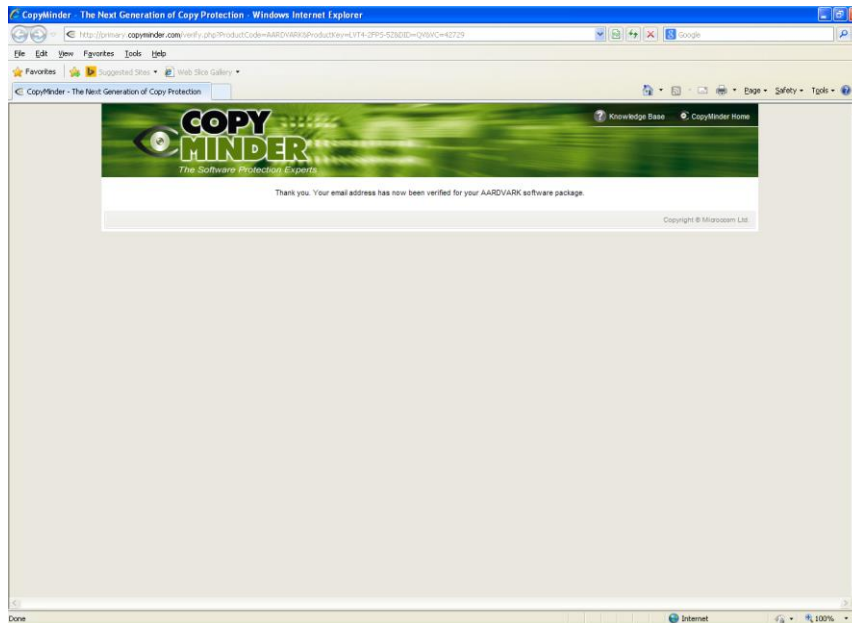

- You will be prompted to complete some contact details for your organisation. Please complete the compulsory fields (the others are greyed out in the trial version) and click on 'OK'.

- Providing the compulsory fields are completed, you will then be informed that an email has been sent to the address registered for verification. You will also be given a licence key (in the format AARDVARK-xxxx-xxxx-xx). Click OK.
- Locate in the email in your Inbox or Junk Mail folder. If the email is in your Junk mail folder, move it to your Inbox to enable the links to become active.

13. Open the email and click the link to the CopyMinder website. You will see a message confirming that email address has now been verified.

14. The Product Registration process is now complete and Aardvark is ready for use. This trial version of Aardvark has been configured to work for 5 program executions in the calendar month starting from the date of installation to enable you to evaluate the product. If you wish to purchase a copy of Aardvark, email aardvark@wrcplc.co.uk
